WHAT TO CONFIRM BEFORE ORDERING

- Name the form: 5-MTHF is the active folate, not folic acid; the salt and the isomer are part of the label.
- Ask for the assay, the isomer profile and the water content; the active form is sensitive to oxidation and light.
- Folic acid and 5-MTHF are different label ingredients with different doses.

- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
