WHAT TO CONFIRM BEFORE ORDERING

- Name the unit and the assay substrate: U/g is not the same as AU/g or a generic protease figure.
- Ask for activity after the process step you will use, not only on the raw powder.
- Confirm the pH and temperature window; the activity can fall outside it.

- Enzyme powders are respiratory sensitisers; the SDS and the dust controls belong in the file.

Indicative document. This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
