WHAT TO CONFIRM BEFORE ORDERING

- Name the ester: ascorbyl palmitate is fat-soluble; ascorbic acid and sodium ascorbate are water-soluble products.
- Ask for the assay and the melting point; the ester is used in oil systems, not in clear beverages.
- The material is light- and heat-sensitive; the pack and the storage condition belong in the specification.
- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

Indicative document. This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
