WHAT TO CONFIRM BEFORE ORDERING

- Name the form: the 10% dispersion, the 1% powder and the pure crystal are different specifications and different labels.
- Ask for the assay, the carrier and the colour; the carrier decides the dispersion and the stability.
- Carotenoids oxidise and fade; the pack and the storage condition belong in the specification.
- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

Indicative document. This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
