WHAT TO CONFIRM BEFORE ORDERING

- Name the counter-ion: calcium aspartate and calcium citrate are different label ingredients.
- Ask for the calcium figure and the assay; the salt name does not state the dose.
- Confirm the hydrate state and the water limit; the hydrate changes the calcium content per gram.

- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
