WHAT TO CONFIRM BEFORE ORDERING

- Name the form: calcium chloride dihydrate and the anhydrous salt are different products with different water and calcium content.

- Ask for the assay and the water; the dihydrate is hygroscopic and deliquesces in humid air.
- The material is hygroscopic; the pack and the storage condition belong in the specification.
- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

Indicative document. This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
