WHAT TO CONFIRM BEFORE ORDERING

- Name the form: L-carnosine and zinc-carnosine are different materials and different specifications.
- Ask for the rotation and the assay; the two together separate the L-form from a blend.
- Carnosine is hygroscopic and can hydrolyse; the pack and the storage condition belong in the specification.
- Do not use the page as a label or a claim.

Indicative document. This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release

parameters, not marketing descriptions.
