WHAT TO CONFIRM BEFORE ORDERING

- Name the salt: choline bitartrate, choline chloride and alpha-GPC are different label ingredients and different choline contents.

- Ask for the choline figure and the assay basis; the bitartrate assay is not the same as the choline dose.
- Choline bitartrate is hygroscopic; the pack and the dose-room humidity belong in the specification.
- Confirm the water content and the particle size for capsule fill and blend uniformity.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
