WHAT TO CONFIRM BEFORE ORDERING

- Name the form: reduced glutathione (GSH) and oxidized glutathione (GSSG) are different materials and different assays.
- Ask for the assay method and the oxidized-form limit; a purity figure without the method is not comparable.
- Glutathione is hygroscopic and sensitive to oxidation; the pack and the storage condition belong in the specification.
- Confirm the destination market's status before quoting; the route is not the same in every market.

- Do not use the page as a label or a claim.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.

HOW TO REQUEST THIS GRADE

01 · BRIEF

Send the target specification, quantity, dosage form and destination market.

02 · COUNTER-SPEC

We confirm what can be matched and the documents available for the grade.

03 · SAMPLE & QUOTE

A sample with its own COA, followed by packing, lead time and terms in writing.
