- Granulated on request

## WHAT TO CONFIRM BEFORE ORDERING

- Name the salt: lysozyme hydrochloride and the free base are different specifications and different labels.
- Ask for the unit definition, the substrate and the assay conditions; an activity number without them is not comparable.
- The enzyme loses activity with heat and moisture; the pack and the storage condition belong in the specification.
- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

**Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.

## DOCUMENTATION RELEASED WITH EACH LOT

| DOCUMENT | CONTENT | SCOPE |
|---|---|---|
| Certificate of analysis | Assay, identity, physical parameters, contaminant panel and the release decision for the lot. | Batch-specific |
| Technical data sheet | Form, hydrate state, CAS, specification ranges, solubility, bulk density, storage and packing. | Product-level |
| Safety data sheet | Sixteen sections covering hazards, handling, storage, transport and emergency response. | Grade-specific |
| Allergen and GMO statements | Major allergens, gluten, animal-derived inputs and GMO status. | Batch-specific |
| Origin and traceability record | Manufacturing site and the link between the lot and the retained sample. | Batch-specific |
| Residual-solvent statement | The crystallisation system and the solvent class, where applicable. | Batch-specific |

## HOW TO REQUEST THIS GRADE

01 · BRIEF

Send the target specification, quantity, dosage form and destination market.

02 · COUNTER-SPEC

We confirm what can be matched and the documents available for the grade.

03 · SAMPLE & QUOTE

A sample with its own COA, followed by packing, lead time and terms in writing.
