WHAT TO CONFIRM BEFORE ORDERING

- Name the form: manganese bisglycinate is a chelate, not the same material as manganese sulfate or gluconate.
- Ask for the manganese figure, the glycine ratio and the assay; the chelate name alone does not state the dose.
- The chelate is sensitive to moisture; the pack and the storage condition belong in the specification.

- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
