WHAT TO CONFIRM BEFORE ORDERING

- Name the hydrate: the monohydrate and the anhydrous salt carry different manganese figures per gram.
- Ask for the manganese figure and the water content on the same certificate.
- The sulfate is the most concentrated common manganese salt; the fill weight follows.
- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

Indicative document. This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
