WHAT TO CONFIRM BEFORE ORDERING

- Name the form: NAD+ and NADH are different oxidation states, different CAS numbers and different specifications.
- NAD is hygroscopic and heat-sensitive; ask for the water, the pack and the storage condition.
- Confirm the destination market's status before quoting; NAD is not authorized as a novel food in every market.
- Do not use the page as a label or a claim.

Indicative document. This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
