WHAT TO CONFIRM BEFORE ORDERING

- Niacinamide and niacin are not interchangeable: the flush, the label name and the dose differ.
- Ask for the nicotinic acid figure; it is the impurity that separates a clean niacinamide from a cheaper grade.
- Confirm the pH and the melting range; both are identity checks that an assay alone does not replace.
- Niacinamide is hygroscopic; the pack and the dose-room humidity belong in the specification.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.

HOW TO REQUEST THIS GRADE

01 · BRIEF

Send the target specification, quantity, dosage form and destination market.

02 · COUNTER-SPEC

We confirm what can be matched and the documents available for the grade.

03 · SAMPLE & QUOTE

A sample with its own COA, followed by packing, lead time and terms in writing.
