WHAT TO CONFIRM BEFORE ORDERING

- Name the protein source and the isolate concentration: pea isolate, pea concentrate and pea flour are different label ingredients.
- Ask for the protein factor and the dry-basis calculation; the as-is figure is lower when moisture is included.
- Pea is a legume; the allergen statement and the cross-contact controls belong in the file.
- Confirm the dispersibility and the taste for the matrix you will run.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
