WHAT TO CONFIRM BEFORE ORDERING

- Name the profile: phytosterols are a mixture, and the sitosterol/campesterol/stigmasterol ratio is the specification.
- Ask for the total sterol figure and the individual sterol profile; the two are not interchangeable.

- The material is insoluble in water; the dosage form and the oil carrier belong in the formula review.
- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
