WHAT TO CONFIRM BEFORE ORDERING

- Name the hydrate: potassium citrate monohydrate and the anhydrous salt carry different potassium figures per gram.
- Ask for the potassium figure, the water content and the pH; the alkalinity is part of the application.
- Potassium citrate and potassium chloride are different salts with different taste and acid load.

- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
