WHAT TO CONFIRM BEFORE ORDERING

- Name the form: L-selenomethionine, selenium yeast and sodium selenite are different label ingredients.
- Ask for the selenium assay and the specific rotation; the selenium figure alone does not prove the organic form.

- Selenium is a trace element with a narrow range; the dose and the overage belong in the specification.
- Confirm the assay basis and the water content; both change the selenium per capsule.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
