WHAT TO CONFIRM BEFORE ORDERING

- Name the form and the IU figure: retinyl acetate, retinyl palmitate and beta-carotene are different label ingredients.
- Convert IU and retinol equivalents before comparing quotes; the label may use either.

- Confirm the carrier and the overage policy; the carrier changes the label and the fill weight.
- Vitamin A is sensitive to light, heat and oxygen; the pack and the process temperature belong in the specification.

> **Indicative document.** This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.
