WHAT TO CONFIRM BEFORE ORDERING

- Name the hydrate: the heptahydrate and the dried or anhydrous salt carry different zinc figures per gram.
- Ask for the zinc figure and the water content on the same certificate.
- The sulfate is acidic and hygroscopic; the pack and the storage condition belong in the specification.
- Do not use the page as a label or a claim: the finished product's status is a separate legal question.

Indicative document. This sheet describes the grade we can quote; it is not a batch COA and does not confirm a result for a specific lot. Final specification, contaminant limits and documentation are agreed in writing before the order. The form, hydrate state, ligand ratio and method are release parameters, not marketing descriptions.

DOCUMENTATION RELEASED WITH EACH LOT
